Projects within Highland-Pigeon Creek.xlsx

Marissa,

We asked George for some information so we could review. See below email. Marco is also working on pulling this information together.

Let's aim for a meeting early next week with both agencies, if that works for you all.

Subject: Seven Hills Mine cumulative impacts

Good morning George,

In an effort to understand the cumulative impacts of the proposed Seven Hills Mine, the EPA is looking at the waters in the Highland-Pigeon Creek watershed that have been identified in Jurisdictional Determinations as a part of potential coal mines, waters proposed for impact in public notices and those waters that were authorized to be impacted by coal mining projects. We have compiled a list of Corps actions related to coal mining. Attached is an Excel file containing the DA number, name, and location of the projects being reviewed. The EPA requests the jurisdictional determinations, public notices, permit applications and modifications for the projects listed. Thank you for your cooperation and if you have any questions feel free to contact me.

Best,

Marco Finocchiaro
